What Is Measured?
Percentage of Colorado Community College students who completed the developmental English/reading requirements within two years

Who Is Counted?
Students entering Colorado Community Colleges for the first time in fall 2006

What It Tells Us
Some 91 percent of students age 17 to 19, 80 percent of students age 20 to 24, and 95 percent of students age 25 or older in Colorado Community Colleges who enrolled in a developmental English/reading course during their first academic year completed the developmental English/reading requirements within two years.
**Why It's Important**

Most beginning community college students must complete at least one developmental education course in mathematics or English (reading, writing, or both), and many must complete multiple courses in one or more subjects. Completing the highest-level developmental course in a subject is the final precollege milestone and is often required to transfer to a four-year institution or to earn a certificate or associate degree.
